DESCRIPTORS	Adult Education; *Audiovisual Aids; *Audiovisual Centers; *Catalogs; Directories; Elementary Secondary Education; Foreign Countries; Higher Education; *Information Services; *Information Sources
IDENTIFIERS	*Europe

ABSTRACT

This directory of audiovisuals available in Europe lists 45 agencies from 16 countries and the types of material about which they can provide information by subject area, media, audience, and language. Agency names and titles of catalogs are presented in the native language of the country, with descriptive material in English, with the exception of French speaking sources, for which the entries are entirely in French. The materials cover the range of student audiences from preschool to adult, and include films, videorecordings, photographs, slides, filmstrips, overhead projector transparencies, and sound recordings. The name, address, and phone number of each national information agency listed is provided and a Curriculum Subject Index and a Student Audience Index provide additional access points to the main listing. Both English and French versions of the introductions, notes on the use of the directory, and the two indexes are included. (MER)

INTRODUCTION AND NOTES ON USE OF THE DIRECTORY

Background and Purpose

The Directory is intended to make easier the task of discovering an item of audio-visual material suitable for a specific educational application that may have been produced somewhere in Europe.

This task is made difficult by the absence at present of a European catalogue of audio-visual material or even of comprehensive national catalogues. One may hope that the problem will be eased as countries build up national data bases and make them available through the EURONET computer network (a step which has recently been taken by the British Library). In the meantime, the Council of Europe has commissioned this listing of agencies, nominated by its member States, which are able and willing to deal with enquiries from outside their national boundaries. The listing could be regarded as the first step in the evolution of a network of audio-visual information centres, within the European Documentation and Information System for Education (EUDISED) which is being evolved by the Council of Europe.

The cost in money and professional effort of designing and producing audio-visual materials of good quality can be so high that everything that is reasonably possible should be done to encourage the sharing of the materials themselves and of the experience embodied in their preparation. It is perhaps significant that 45 agencies in 16 countries have signified their willingness to help in these respects. Every agency listed has committed itself to the philosophy underlying the Directory.

The Materials

The media include film, videorecording, photograph, slide, filmstrip, overhead projector transparency, sound recording and others. The materials cover the range of student audiences from pre-school to adult.

Items about which information can be provided will have a known educational application, although they need not have been conceived for that purpose. They will be available outside the country of production, whether for sale, on hire, on loan or free of charge.

While the language used in an item may cause difficulty, it should be remembered that a teacher can suppress the sound track of a film or videorecording and replace it by his own "live" commentary.

The Information Agencies

The agencies that have been listed have been identified by a request to member States to nominate:

(i) those which are able and willing to answer, from their own records, requests for information about audio-visual materials suitable for specific educational purposes in one or more subjects of the curriculum;

(ii) those which do not necessarily have direct access to comprehensive information of this kind, but which are able and willing to act as referral points to agencies in the first class.

Every agency can therefore be regarded as providing a bona fide information service to a part of the education system of the country in which it is located.

Using the Directory

For each country, the details which it has provided about its activities are displayed in a standard format. The curriculum subjects covered are indicated by code numbers corresponding to the main divisions of the Universal Decimal Classification (see below).

To search for materials in one of the curriculum subjects, use the Curriculum Subject Index.

To search for materials suitable for a given level of student audience, use the Student Audience Index.

Making an Enquiry

Where the relevant agency is shown as publishing a catalogue, the first step may be to obtain a copy.

Alternatively, a specific enquiry may be addressed to the agency, either directly or, preferably, through an agency in the enquirer's own country. As far as possible, the terminology used in the Directory should be adhered to, especially as regards media, curriculum subjects and student audience. This is desirable in order to minimise language and cultural problems; for this reason the terms used for media and student audience have been taken wherever possible from EUDISED Multilingual Thesaurus for Information Processing in the Field of Education. Paris and The Hague: Mouton, 1974. ISBN 2 7193 0937 0. The Thesaurus was prepared by the Council of Europe, and reference to it

may be found helpful in formulating an enquiry where problems of communication are anticipated.

Enquiries should not be addressed to the Council of Europe or to me. However, I would be grateful for a copy of any communication, as an aid in monitoring the use made of the Directory.

Acknowledgements

I am grateful to the agencies listed for their cooperation in providing information about their activities.

The collation and presentation of the information were carried out by Mrs. Susan Sheahan.

950 History of Asia
960 History of Africa
970 History of North America
980 History of South America
990 History of Oceania, Australasia and Polar regions

INTRODUCTION ET NOTES SUR L'UTILISATION DU REPERTOIRE

Origine et raison d'être

Ce répertoire a pour objet de faciliter la découverte d'un document audiovisuel, se prêtant à une application pédagogique particulière, qui a pu être produit quelque part en Europe.

Les recherches sont rendues difficiles à l'heure actuelle par l'absence d'un catalogue européen de la documentation audiovisuelle, ou même de catalogues nationaux suffisamment étoffés. On peut espérer que le problème perdra de son acuité à mesure que les pays constitueront des bases de données nationales et les rendront accessibles à travers le réseau informatique EURONET (comme la British Library en a pris récemment l'initiative). En attendant, le Conseil de l'Europe a fait dresser cet inventaire des organismes, désignés par ses Etats membres, qui sont aptes et disposés à donner suite à des demandes de renseignements en provenance d'autres pays. Il est permis d'y voir un premier pas vers l'établissement d'un réseau de centres d'information sur les documents audiovisuels dans le cadre du système européen de documentation et d'information en matière d'éducation (EUDISED) que le Conseil est en train de mettre sur pied.

La conception et la production de documents audiovisuels de qualité sont bien souvent si onéreuses, elles exigent des spécialistes concernés une telle somme d'efforts, qu'il faut encourager autant que faire se peut la mise en commun de ces documents eux-mêmes et de l'expérience acquise à l'occasion de leur élaboration. Il est peut-être symptomatique que 45 organismes de 16 pays aient marqué leur volonté d'apporter leur concours à cet égard. Chacun des organismes énumérés s'est engagé à adhérer aux principes sur lesquels repose le répertoire.

Les documents

Les supports comprennent: film, enregistrement sur magnétoscope, photographie, diapositive, film fixe, transparent pour rétroprojecteur, enregistrement sonore, etc. La documentation embrasse tous les niveaux d'enseignement, depuis le préscolaire jusqu'à l'éducation des adultes.

Les documents sur lesquels des informations pourront être fournies auront une application pédagogique connue, sans avoir été forcément conçus pour cet usage. Il sera possible de se les procurer hors du pays de production, que ce soit en achat, en location, en prêt ou à titre gracieux.

La langue utilisée dans un document risque d'être parfois source de difficultés, mais il ne faut pas oublier que l'enseignant a la possibilité de supprimer la piste sonore d'un film ou d'un enregistrement sur magnétoscope et de la remplacer par son propre commentaire "en direct".

Les organismes d'information

Les organismes énumérées ont été recensés à la suite de l'envoi aux Etats membres d'un formulaire les invitant à désigner:

(i) ceux qui sont en mesure et prêts à répondre, à partir des données dont ils disposent, à des demandes de renseignements sur des documents audiovisuels utilisables à des fins pédagogiques déterminées dans une plusieurs matières d'enseignement;

(ii) ceux qui n'ont pas nécessairement un accès direct à une information d'une telle ampleur, mais qui sont en mesure et prêts à diriger les demandeurs vers des organismes de la première catégorie.

Chacun de ces organismes peut donc être considéré comme fournissant un service d'information authentique à un secteur du système éducatif du pays ou s'exerce son activité.

Comment utiliser le répertoire

Pour chaque pays, les renseignements communiqués sont reproduits dans un format normalisé. Les matières d'enseignement couvertes sont indiquées par des numéros codiques correspondant aux grandes divisions de la Classification décimale universelle (voir plus loin).

Pour rechercher des documents ayant trait à l'une des matières, il y a lieu de consulter l'index "Matières".

Pour rechercher des documents convenant à tel ou tel public, consulter l'index "Publics".

Pour formuler une demande de renseignements

Lorsqu'il est précisé que l'organisme compétent publie un catalogue, il sera sans doute bon de commencer par s'en procurer un exemplaire.

A défaut, une demande expresse pourra être adressée à cet organisme, soit directement soit - de préférence - par le canal d'un organisme du pays demandeur. Il conviendra de respecter autant que possible la terminologie employée dans le répertoire, notamment pour les supports, les matières et les catégories de publics, afin de réduire au minimum les problèmes linguistiques et culturels. C'est pour répondre à ce souci que les désignations des supports et des différents publics ont été prises dans toute la mesure du possible de EUDISED thesaurus multilingue pour le traitement de l'information en éducation (La Haye et Paris: Mouton, 1974. ISBN 2 7193 0945 1). Ce thesaurus a été établi par le Conseil de l'Europe, et il pourra être utile de s'y reporter pour formuler une demande lorsque des difficultés de communication sont à craindre.

Les demandes ne devront pas être adressées au Conseil de l'Europe ni à moi-même. Toutefois, je serais heureux de recevoir copie de toute communication, afin de pouvoir suivre plus aisément l'usage qui sera fait du répertoire.

Remerciements

Je tiens à exprimer ma gratitude aux organismes cités dans cet ouvrage pour l'esprit de coopération dont ils ont fait preuve en communiquant des renseignements sur leurs activités.

Le collationnement et la mise en pages des données ont été assurés par Mme Susan Sheahan.

ENTRY NO. 1

COUNTRY: Austria

Name:	Bundesstaatliche Hauptstelle für wissenschaftliche Kinematographie
Address:	Schönbrunnestrasse 56 A-1050 Wien
Telephone:	(0222) 55 45 05 - 0

Materials about which information can be provided

Subject(s):	All
Media:	Film and accompanying printed material
Audience:	University
Language(s):	German and some English

Published Catalogue(s)

Title:	(1)	Wissenschaftliche Filme, Katalog 1974 (main catalogue)
	(2)	Wissenschaftliche Filme, Nachtrag zum Katalog 1974 (amendment to catalogue)
Contents:		Lists about 3,000 films of the archives of BHWK. Titles are grouped under several subjects. Each entry (except the films of the Encyclopaedia Cinematographica) contains mediographic data and a summary of the contents of the film in question
Frequency of publication:		Irregular
Date of latest issue:		March 1979
Price:		To university users in limited numbers, free of charge

ENTREE NO. 2

PAYS: BELGIQUE

Nom:	Audiovisueel Studicentrum (Centre d'études audio-visuelles)
Adresse:	Weldadigheidsstraat 50 B-3000 Leuven
Téléphone:	(016) 228291

Matériels sur lesquels des renseignements peuvent être fournis

Matière(s):	77
Supports:	Film, enregistrement sur magnétoscope, photographie, diapositive ou film fixe, transparent pour rétroprojecteur
Public:	Secondaire premier cycle, secondaire deuxième cycle, post-secondaire, université, formation professionnelle, adulte
Langue(s):	Français, anglais, néerlandais
Rapports de recherche ou des analyses évaluatives:	Ils sont disponibles

Les services d'information offerts

Le centre a pour objet d'informer sur les possibilités de conférences et sur l'utilisation du film et des autres moyens audio-visuels. Il procure des renseignements au sujet de l'emploi de ces moyens comme auxiliaires pour l'éducation permanente et l'enseignement sur demande écrite.

Il comprend une bibliothèque et un service de documentation et produit également du software audio-visuel.

ENTRY NO. 3

Contents:	List of material available with brief description of content, together with the price of each component
Frequency of publication:	Occasional
Price:	Free of charge

ENTRY NO. 6

COUNTRY: Finland

Name:	National Board of General Education
Department:	Educational Materials Bureau
Address:	Hakaniemenkatu 2 00530 Helsinki 53
Telephone:	(90) 7061

Materials about which information can be provided

Subject(s):	All
Media:	Mainly material for language laboratory and books
Audience:	Primary, lower secondary, upper secondary, post-secondary
Language(s):	Finnish, Swedish, English
Research or evaluation reports:	Available

Published Catalogue(s)

Title:	A catalogue of approved books
Contents:	Lists the names of the books to be used in schools, set out under subject titles
Frequency of publication:	Once a year, with additional sheets 4-6 times a year
Date of latest issue:	January 1979
Price:	Free of charge

Information services available

The National Board of Education approves all the books used in schools (text books and workbooks) and other materials to be used in teaching, like extra readers, teachers' guides, etc. Materials are also produced in small quantities for use in language laboratories in Latin, Russian and Lapps, and for handicapped children.

ENTRY NO. 7

COUNTRY: Finland

Name:	State Audiovisual Centre
Address:	Hakaniemenkatu 2 00530 Helsinki 53
Telephone:	(90) 7061

Materials about which information can be provided

Subject(s):	All
Media:	Film, slide or filmstrip, overhead projector transparency, sound recording
Audience:	All, except pre-school and university
Language(s):	Finnish, Swedish

Published Cataloque(s)

Title:	Opetuselokuvaluettelo 1979 (Catalogue of Educational Films)
Contents:	Catalogue of films on loan
Frequency of publication:	About every 2 years
Date of latest issue:	January 1979
Price:	Free of charge

Note:

As a rule, these films may not be borrowed abroad from the State Audiovisual Centre.

Entrée NO. 8

PAYS: France

Nom:	Centre Audio-Visuel de l'Ecole Normale Supérieure

Films Department provides film world-wide in support of British educational and cultural relations with overseas countries.

Medical, scientific, general interest and arts films are held but the Council also holds educational television rights and non-theatric rights in a number of series made in collaboration with the British Broadcasting Corporation.

Many Council offices overseas have film libraries of their own, but films can also be borrowed from the London Film Library. The Department cannot sell films but can give information from its records as to where they can be bought.
